

SHUBHAM PASRICHA

Generative AI Developer • Educator & Mentor • LLM & RAG Practitioner

New Delhi, India | [linkedin.com/in/shubhampasricha](https://www.linkedin.com/in/shubhampasricha) | github.com/shubhampasricha | BCA · CHRIST University, Delhi NCR

PROFESSIONAL SUMMARY

Final-year BCA student and Generative AI practitioner with hands-on internship experience building production RAG pipelines, LLM-orchestration systems, and AI automation tools at Bharti Airtel. Passionate about making complex AI concepts accessible — translating technical architecture into clear, practical learning for diverse audiences. Experienced in Python, LangChain, FastAPI, Prompt Engineering, and multi-model workflows. Eager to channel this expertise into structured training and mentorship as a Gen AI Instructor.

CORE TECHNICAL SKILLS

Gen AI & LLMs	GPT-4o, Claude (Anthropic), Gemini, LangChain, LangGraph,
RAG & Agents	RAG pipeline design, AI Agent frameworks, multi-step LLM orchestration
Prompt Eng.	Zero-shot, few-shot, chain-of-thought, structured output, system prompt design
Dev Stack	Python, FastAPI, Streamlit, Django, Redis, MongoDB, PostgreSQL, SQLite
Data & ML	Pandas, NumPy, Scikit-learn, ML model evaluation, churn prediction, data analysis
Teaching Skills	Concept simplification, live demos, curriculum design, technical & non-technical audiences

PROFESSIONAL EXPERIENCE

Generative AI & AI Automation Intern | Bharti Airtel

Jan 2025 – May 2025 • Gurugram

- Built a production-grade RAG-based Sales Enablement Chatbot using GPT-4o mini, LangChain, PgVector, Django, Celery, NATS, Redis, and MongoDB — deployed on Azure Bot Service (Teams) and GCP, serving 200+ internal users.
- Designed multi-stage prompt engineering workflows for structured LLM outputs with Pydantic validation; authored internal documentation simplifying RAG concepts for non-technical stakeholders.
- Implemented semantic search pipelines with embedding-based retrieval, enabling sub-2-second query resolution across 50K+ product documents.
- Delivered a live technical walkthrough of the chatbot architecture to a cross-functional team of 20+ members, bridging engineering and business audiences.

Product Analysis Intern | Bharti Airtel

Aug 2024 – Dec 2024 • Gurugram

- Researched five fragmented Airtel developer portals and documented friction points; pitched 'OneSDK' — a unified developer gateway — to a Senior PM with a 17-slide data-backed deck.
- Conducted user interviews and synthesized findings into actionable product recommendations, practicing stakeholder communication and structured storytelling.

KEY PROJECTS

RAG Sales Enablement Chatbot — LangChain · GPT-4o mini · PgVector · FastAPI · Azure Bot Service

- End-to-end production RAG system with semantic retrieval, NATS message brokering, and Celery async task processing. Covers core GenAI concepts ideal for teaching: embeddings, chunking strategy, retrieval ranking, and LLM response grounding.

AI Postmortem & RCA Agent — FastAPI · LangChain · React · Pydantic

- Two-stage LLM pipeline with structured output generation and automated severity classification (SEV-1–4). Designed to teach LLM orchestration, prompt chaining, and production-grade AI application patterns.

SRE AI Agent — Grafana · Prometheus · OpenRouter · LangChain · MCP

- Agentic system with tool-calling, metric ingestion, and multi-handler routing — a hands-on demonstration of AI agent design principles for learner audiences.

TEACHING & COMMUNICATION HIGHLIGHTS

- Authored internal knowledge-base documentation on Generative AI concepts, simplifying embeddings, vector search, and prompt engineering for non-technical stakeholders.
- Mentored junior peers in Python and ML fundamentals during university coursework; comfortable conducting hands-on coding sessions and live demos.

EDUCATION

Bachelor of Computer Applications (BCA)

2022 – 2025

CHRIST (Deemed to be University), Delhi NCR • CGPA: 3.8 / 4.0

Relevant Coursework: Artificial Intelligence, Machine Learning, Data Structures & Algorithms, Database Management Systems, Python Programming, Cloud Computing

CERTIFICATIONS & CONTINUOUS LEARNING

Actively pursuing certifications in Generative AI and LLM application development. Continuous self-learning through hands-on project building, open-source contributions, and following emerging AI research.
